CHICKPAPER

For the best start for day-old chicks

Chickpaper works quite simply. The paper is rolled out under the drinkers and sprinkled with chicken feed. The rustling sound of chickens walking on the paper attracts the attention of the other birds. In this way they also easily find water and feed. The fact that the paper absorbs droppings quickly makes the environment of the chickens super hygienic. This prevents the chickens from pecking at the droppings.

ADVANTAGE OF CHICKPAPER

- Strong
- Light-weight
- Easy to handle
- 100% bio-degradable
- Super absorbent
- With roughened surface to prevent claw problems
- Hygienically packed
- Paper fits in almost every paper- feed trough (width 68cm)

CHICKPAPER CLASSIC

- 2 paper rolls in a box
- Outer box wrapped in plastic film
- Paper length 200 m per roll
- Paper degrades from day 2-3

CHICKPAPER ADVANCED

- 2 paper rolls in a box
- Outer box wrapped in plastic film
- Paper length 200 m per roll
- Paper degrades from day 5-6
